

Application Serial No. 10/671,968  
Reply to Office Action dated September 21, 2005

Docket No. 1232-5146

### **REMARKS**

Reconsideration of the above-identified application in view of the foregoing amendments and the following remarks is respectfully requested.

#### ***Claim Status***

Claims 1-14 are pending. Claims 1, 7, and 8 are amended herein. No new matter is added by these amendments. Claims 6 and 9 are canceled herein without prejudice or disclaimer. After entry of the foregoing amendments, claims 1-5, 7, 8, and 10-14 remain pending in this application, of which claims 1, 7, and 8 are independent in form.

#### ***Allowable Subject Matter***

Claims 7 and 9 have been indicated containing allowable subject matter and as being allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. September 21, 2005 Office Action at 7.

Claim 7 has been rewritten in independent form to include the limitations of the previously presented versions of claims 1 and 6 from which claim 7 depended. Claim 8 has been rewritten to include the limitations of the previously presented version of claim 9 and claim 9 has been canceled. Accordingly, claims 7 and 8 are believed to define patentable subject matter.

Applicant submits that the aforementioned objections are hereby overcome or otherwise rendered moot, and request that the objections be withdrawn. Claims 7 and 8 as herein amended are submitted to be allowable.

#### ***Claim Rejections – 35 U.S.C. §§ 102 and 103***

Claims 1, 2, 4 and 6 are rejected under 35 U.S.C. § 102(b) as allegedly being anticipated by Iwagami et al., U.S. Patent No. 4,369,450 ("Iwagami"). Claims 3, 5, 11-14 are

rejected under 35 U.S.C. § 103(a) as allegedly being unpatentable over Iwagami in view of Kurata, U.S. Patent No. 6,017,111 ("Kurata"). Claims 8 and 10 are rejected under 35 U.S.C. § 103(a) as allegedly being unpatentable over Iwagami.

Applicant respectfully disagrees with the characterization of the claims and prior art in the stated rejections and respectfully traverses these rejections.

Independent claim 1 is amended herein to more clearly recite the claimed subject matter. Specifically, amended claim 1 is directed to an inkjet recording apparatus comprising ink mist collecting means for collecting ink mist generated when recording means discharges ink in order to form an image on a recording medium, wherein the recording means alternates between a state where it continuously discharges the ink and a state where it does not discharge the ink, and wherein the ink mist collecting means collects ink mist when the recording means is in the state where it does not discharge the ink.

Applicant respectfully submits that the present invention as claimed is neither taught nor suggested by, and therefore is neither anticipated nor rendered obvious in view of, Iwagami.

Claim 6 has been canceled, and claim 8 has been amended as set forth above to incorporate the allowable subject matter of claim 9, overcoming or otherwise rendering moot the rejections of claims 6 and 8.

Dependent claims 3, 5, 11-14 depend from amended claim 1 and claim 10 from amended claim 8, and are each believed to define patentable subject matter for at least similar reasons as independent claim 1 and 8.

Applicant has not addressed the individual rejections of the dependent claims but reserves the right to do so, should such be necessary and appropriate.
